Dr Hanna Stöger (1957 – 2018)

On Tuesday November 6, a symposium will be held in commemoration of our dear colleague Hanna Stöger (1957 – 2018) who passed away last August. The symposium, entitled 'Fernweh for Ostia', focuses on Hanna's many important contributions to the archaeological study of Ostia. A variety of papers, all presented by colleagues close to her, show how multifaceted her research was, ranging from archaeology and archaeological fieldwork to Space Syntax Analysis and Georeferencing.

The symposium will take place in the Leemanszaal of the National Museum of Antiquities from 13.00 / 13.30. You are all most welcome to attend the symposium and/or the drinks afterwards, which will take place in Grand Café Pakhuis from 17.30 onwards.

On November 7 (13.45 sharp) Hanna's PhD Mark Locicero will defend his PhD thesis on Ostia's *Liquid Footprints* in the Academy Building.
